BAMBERGER'S DE LAMAR MINES

Reports Show Property to Be Turning Out Big and Rich.

UTAH OPERATOR IN NORTH

U. H. CONRAD PILING UP MIL LIONS IN NEW FIELD.

Reports from the Bamberger-De Lamar properties at De Lamar, Nev., are of a most inspiring nature. Every month's development in both old and ew territory is adding immeasurably to the tremendous ore reserves, and it can be said in all truthfulness that there has never been a time in the history of the property, either under the De Lamar regime or since, that the mines have presented anything like the showing that they do today.

New ore bodies on all the levels of the older portion of the mine from the third to the seventh and work on the eighth beer

Ilmits of this magnificent shoot of fine milling ore have not yet been determined and the work so far done on the twelfth level indicates that it will prove just as important there. The machinery for a new hoisting plant on this portion of the mine is expected to reach camp any day, and when it has been installed much better headway in the development of this portion of the wonderful gold bonanza can be made.

New and heavier rails with which to relay the main operating tunnel in the clay the main operating tunnel in the older portion of the property are beginning to arrive at camp and will be only a short time till old, light rails, which have outlived their usefulness, will have been replected.

tiated the sale of the Alliance prop-cy at Park City to the Silver King, All the Smelters Are Now Getting d who, at one time, was largely in-ested in the Massachusetts at Park

oct, 24 the rich fissure vein was reached it a depth of 625 feet. This strike roves the vein more than a mile and half long, and it has already been hown to be from four to six feet wide, xtending from Pooley canyon to Monana creek. Developments to date show his to be one of the longest shafts of outlineaus high-grade one in the world.

reight and treatment charges. The Jenus ledge shows up for two and alf miles on the surface, and the Mon a ledge one and a half miles, while Uranus has been stripped for a

Biggest Strike Ever Made.

while others show on the surface run-ning north and south. One can walk over these veins for miles, finding the About 80 to 90 per cent of the values

Speaks Weil of It.

American Fork, Nov. 23.—Joseph Storrs and W. S. Storrs of this place, in connection with John McTague, a Montana mining expert, have just returned from an inspection of the American Fork canyon properties. While there they visited the Blue Rock. Wyoming, Dutchman, Goodsell, Scotchman and several mines of minor importance.

The Blue Rock they found to be in a very fine condition, both from a standpoint of being well and systematically timbered, and that the ground in which they are now working is showing ore of very promising values. The last shot put in by the miners broke into the lime contact, the objective point that they had been working for. It disclosed a fine sprinkling of carbonate ore, similar in appearance to that which is being taken from the Wyoming mine. They also encountered a small stream of water at this point, and during the next few feet they expect to open up ore that will be of a shipping grade. In all something over 1300 feel of tunnels and drifts have been ren.

After an inspection of this property

to the seventh and work on the eighth level is progressing with every assurance that during the next week the tremendous shoot encountered on the seventh level will be tapped there.

On the eleventh and twelfth levels in the "Hog Pen" ground all the men that the present limited hoisting facilities will allow are being worked. The ore body on the eleventh level has been cross-cut for a distance of forty feet and rifted through for sixty feet. The limits of this magnificent shoot of fine milling ore have not yet been determined and the work as for done or the first the Wyoming mine, which is located on the Miller hill, and operated by the Tyngs under lease. At this place they found about forty men at work. At the bins about 500 sacks of ore is awaiting transportation, and according to information afforded them by Mr. Tyng, he expects to be able to keep a few teams busy during the entire winter hauling the ore to the cars at this place. After having given the mines a very careful inspection of this property they visited the Wyoming mine, which is located on the Miller hill, and operated by the Tyngs under lease. At this place they found about forty men at work. At the bins about 500 sacks of ore is awaiting transportation, and according to information afforded them by Mr. Tyng.

After an inspection of this work have been to the work as the Wyoming mine, which is located on the Miller hill, and operated by the Tyngs under lease. At this place they found about forty men at work. At the bins about 500 sacks of ore is awaiting transportation, and according to information afforded them by Mr. Tyng.

After an inspection of this Wyoming mine, which is located on the Miller hill, and operated by the Tyngs under lease. At this place they found about forty men at work.

Company's Lead Property Is Turning Out Well-Arranging to Ship.

ginning to arrive at camp and will be only a short time till old, light rails, which have outlived their usefulness, will have been replaced.

As stated at different times by The Herald, work on the new cyanide plant, designed to handle 500 or 600 tons of tailings from the old rich dumps, is progressing only as circumstances will allow. The difficulty in having material delivered for this plant has made it improacticable to keep a large force of skilled mechanics on the job. To have tried it would have been to incur much unnecessary expense, as many of them would have been held under pay for at least a portion of the time, with nothing to do. For these reasons it is not expected that the plant will be placed in commission before spring.

New boilers are soon to be installed at the company's great power and pumping plant in the Meadow Valley wash and, with this done, there will be no shortage of either power or water during the winter months.

MAKING HIS MILLIONS.

Old Utah Operator Owns Fabulously Rich Mines in the North.

Colonel J. H. Conrad, who will be promethaned by the sum of the company with a made to the plant with the plant in the Meadow Valley wash and, with this done, there will be no shortage of either power or water during the winter months.

Old Utah Operator Owns Fabulously Rich Mines in the North.

Colonel J. H. Conrad, who will be promethaned by the page where we have a proper to be contracted to the carried out of the plant will be made to resume there until after the first of the year.

COKE CRISIS IS OVER.

as Much as They Need.

and who, at one time, was largely interested in the Massachusetts at Park Ity, with William M. Curtiss, now superintendent of the American Flag. is evidently doing big business in the northern country, where he has been for the past several years, or ever since ne closed up his business affairs in this state and Montana.

Every report coming from the new amp at Conrad, Windy Arm, in the Yukon-British Columbia borderland, boes to corroborate the declaration of he men who were first in the field, hat this is by far the greatest thing in the new north. Colonel J. H. Conad, the father of the district, and his issociates in the chief companies as yet iperating form the closest kind of cororation, in which interests are not ourchasable.

On the Mountain Hero claim last season's development of the Montana vein exposed ore of the value of \$12,000,000. t was at that date that General Maniger G. A. Singer of the Conrad-Conolidated company began operations on he Mountain Hero guich, half a mile was driven as a cross-cut, and on oct. 24 the rich fissure vein was reached that a depth of 625 feet. This strike

WORK TO BE RESUMED.

Lipman Tunnel Enterprise on Wood River Will Now Be Pushed.

ana creek. Developments to date show his to be one of the longest shafts of ontinuous high-grade ore in the world. The Uranus claim has also been developed to such an extent that there are 0,000 tons of ore in sight.

Although nearly all the best strikes ave been made this summer and practically all within the past two years, ver 3,400 feet of work has already been one on Windy Arm claims. The Conad-Bonanza have done 2,500 feet of work lone, and are putting in a tramway our miles long at a cost of \$75,000. A hipment of 100 tons of ore was maderom the Venus claim of the Conradionsolidated to the Tacoma smelter, which netted \$102.40 after paying all reight and treatment charges. The

UNION PACIFIC SAVED THE DAY

Pacific late in the day that any effect ive progress was made toward repairing some of the sensational speculative favorites proved to be overwhelming and caused violent declines in those stocks and a sympathetic recession in the general list. A few specialties continued to make an upward spurt, but they were not of a character to sustain confidence nor to hold the list against the effective selfing elsewhere. The state into which the speculative movement had fallen in the last few days, and especially the rather wild movements of yesterday, caused some perturbation and aroused a fear that they were of a kind which would run quickly to culmination owing to the violence of the manipulative methods purspued. some of the sensational speculative fa

olence of the management of repued.

Very attractive profits also were ofred at many points in the market. The
insequence was that the selling moveent, once inaugurated, grew of its own
gree, with the result of a general show
f weakness by midday. Speculative prot-taking was especially consplications in
ceading. Smelting, Brooklyn Transit,
anaconda and the southern group of iron
and steel stocks. Some of the late runers which have circulated in conneclon with the operations in all of these

Anaconda and the solthern group or from and steel stocks. Some of the late rumors which have circulated in connection with the operations in all of these stocks have been so little credible that those who had bought on the strength of them were easier thrown into apprehension upon their denial.

A bad effect upon sentiment was produced also by the evidence of a lack of support in the Rock Island group and the rapid decline in prices there under light liquidation. Rumors circulated that there was to be no dividend paid on the second preferred stock of the St. Louis & San Francisco Railroad company, which was the weakest stock in the group. The denial of this rumor had little immediate effect in rallying the stock. During the morning period of weakness the Metropolitan traction stocks showed notable seringth against the current of the market and they were joined before the general market rallied by the United States Rubber stocks and the International Paper stocks. It was not, however, untit the enormous demand for Union Pacific developed that any effective resistance was offered to the general weakness of the market. The character of the dealings in Union Pacific stamped everywhere easily as of highly centralized origin, and the favorable view of the movement was that the demand was from inside sources based on knowledge of the character of the annual report, the publication of the company's Northern Securities assets as disclosed in the report, showed sucl large profits as to justify the movement. The view of the movement as of specalative origin found encuoragement in the face that the operations in the stock, were on a very large scale on the part of the specanes of the search of the general was of the sources and the part of the specanes of the conducted the recent of the general was of the publication of the company's Northern Securities assets. fact that the operations in the stock were on a very large scale on the part of the same operators who conducted the receal movement in Reading. A wager was of fered from this source that Union Pacific was destined to reach 15 on the movement in exactly the same manner that twager was made early in the Reading movement as to its ultimate high prict. There was no notable change in actual conditions. Prices of fron and steel, as cording to trade authorities, are held down only by main force. The sale of \$12.500,000 of New York City bonds did no ruffle the tranquility of the money market. Foreign exchange also was stead, and discounts in London were lower. The price of copper was lifted to the highes level touched since 1901. The distribution of an installment of the deferred divident on Republic Steel preferred was knowled.

Mining Notes. James W. Neill, the mining engineer, came in from the coast late Wednesday afternoon and left at night for Butte, Mout.

The Pioneer sampler yesterday reported the receipt of two cars of ore from Ring the receipt of two cars of ore from Bins-nam, and one each from Alta. Idaho and Nevada.

Nevada.

Seven cardoads of ore from Tintic, one from Bingham, one froom Big Cotton: wood and one from Idaho were reported at the Taylor & Brunton sampler yesterday mornins.

J. M. Wheeler, who has some promising prospects in the West Tintic district, has been out in camp for the last two weeks looking after the annual assessment work that is being done.

A. J. Bettles left for the Cactus properties at Newhouse last night. With him were Mrs. Bettles and Mrs. Joseph Dederichs, who have gone to Los Angeles to visit the children in school there, The 5c assessment on Lower Manmoth became delinquent yesterday. Sale day is set for Dec. 15. Secretary Gus Reeves had his hands full taking in money in payment of the assesement during the day.

George L. Bemis has purchased the mining stock exchange seat of Ralph Guthrie and the formalities of making application for membership under it having been complied with, it is understood that Mr. Bemis will take an active part in the business of that organization.

Subside.

Manager Tony Jacobson leaves for Alta today to look after matters at the Columbus Consolidated. The new crude ofe bins that have been erected on the opposite side of the big mill from the concentrate bins, and close to the mouth of the Howland tunnel, are ready for use, and from now on it will be much easier to store the ore and load into wagons for transpor atton down the canyon than formerly. This and other surface improvements that have been made during the fall place the company in fine shape for the winter months.

J. OBERNDORFER,

cific movement, but the earlier losses were pretty well restored in the general list. The stock under special pressure, however, continued weak and made the lowest prices of the day in the last few minutes of the market, thus unsettling the close, which was decidedly feverish and very irregular.

Bonds were steady. Total sales, par value, \$5,50,000. U. S. bonds were all unchanged on call.

day bills: posted rates, 4834/9484 and 437/9 437/2; commercial bills, 4824/9482%. Bar silver, 64%. Mexican dollars, 4942. Government and railroad bonds steady.

Treasury Statement.

Washington, Nov. 23.—Today's statement of treasury balances in the general fund, shows: Available cash balances, \$133.532.635; gold coin and buillon, \$88,140.—923; gold certificates, \$43,762.990.

GRAIN AND PROVISIONS.

Chicago, Nov. 22.—Reports of damage to the wheat crop in Argentina caused a sharp rally in the market here today. The May option closed at a net gain of 7½ and other grains were higher in sympathy. Corn was up ½, oats gained ½, and provisions were 7½ to 17½ higher.

The wheat market was strong throughout the entire day. The change from the weakness of the last three days was partly reaction from the tecent bearish sentiment, but at the same time the news of the day was considered by traders to amply justify the persistent demand that carried prices up fully 1 cent per bushel. A private cablegram from Argentina was the principal cause of the strength shown. The message mentioned damage by frost to the wheat crop in the central and southern district of the country, but placed the loss at 40 per cent, instead of 10per cent, as declared in previous cablegrams. During the night rain had fallen over a large portion of the wheat growing section of the United States, making the movement of the crop more difficuit. In addition large sales of flour were reported from Minneapolis, and cash wheat was reported in active demand at all grain centers. Shorts and commission houses were urgent bidders for wheat throughout the day, and the volume of trading was large. The market closed strong at \$7.0874. Final quotations were 'a higher for May, at \$7.0875, close to the highest point of the day. May opened a shade to \$7.5675. Final quotations were 'a higher for May, at \$7.0875, close to the highest point of the first half hour of trading the corn market was easy on gener. The market was the private was market was easy on gener.

The feature of trading in the oats mar The feature of trading in the oats market was liberal liquidation in the December delivery. Later shorts covered freely on the strength of other grains. May closed \(\frac{1}{2} \) up, at 22.

Provisions were firm on moderate buying by local bulls. Covering by shorts gave conspicuous strength to pork. An advance of 5 cents in the price of live hogs aided bullish sentiment. At the close May pork was up -5\(\frac{1}{2} \) and lard and ribs were each up 7\(\frac{1}{2} \).

The leading futures ranged as follows:

HERALD'S WANT PAGE

Dr. Cook's Certain Methods

The Most Reliable, Quickest and Safest Ever Perfected. MY SKILL has no equal in the cure of Pelvic and private diseases of men, because I have advanced with the rapid upward march of medical science, and made a specialty of the diseases I treat. My modern methods are every day proving that they are positively the safest, quickest and most reliable that have ever been perfected for curie.

for curing ELOOD POISON, SKIN DISEASES, SORES, ULCERS, STRICTURE, VARICOCELE, NERVOUS DECLINE, PILES, FISTULA, RUPTURE, HYDROCELE and DISEASES of the KIDNEYS and PROSTATE.

There is absolutely no patchwork about the

PROSTATE.

There is absolutely no patchwork about the results of the diseases I make a speciality, for soon after beginning my treatment every symptom of diseases I make a speciality, for soon after beginning my treatment every symptom of disease disappears and the trouble never returns.

IMPORTANT—I will cure you for less money than you can be treated for by any other specialist in Salt Lake. You will have to come to me sooner or later in order to be properly cured: why not before you have lost your money in doctoring with cheap, or dishonest, unskilled specialists?

CURE OR NO CHARGE—My patients receive a written contract, guaranteed by a deposit of \$50.00 in the bank, to cure and render entire satisfaction or refund money.

or refund money.

CONSULTATION FREE, CONFIDENTIAL and INVITED—A personal, thorough and searching examination is required, though if inconvenient to call, write me for information. Office hours: 9 a. m. to 8 p. m., excepting Sundays, from 9 to 12:30. Address or call
